Dear TESDA Assessor

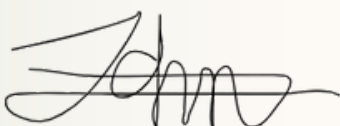

On behalf of Raevin D. Constantino, I am writing this to recommend him as an excellent Game Developer to work under the Technical Education and Skills Development Authority (TESDA). I had the privilege, as a Mechanical Engineer, to work with him during the development of a prototype simulation game involving the fundamentals of robotics, where I got to observe his practical skills and creative capabilities.

Throughout the time of working together with Raevin D. Constantino, he has demonstrated outstanding technical understanding, particularly in the application of mathematical concepts and physics principles to real-world phenomena. His ability to convert the required criteria for problem-solving into the world of game programming and design was remarkable. He has delivered excellent outputs of programming works and creation of websites, particularly handling C++ and JavaScript, and also exhibited punctuality. The qualities he possesses demonstrate his preparedness to succeed in the field of game development, especially under the standards of TESDA's working competencies.

In addition to his technical understanding, Raevin D. Constantino is a committed, perceptive, and hardworking person. He shows passion for innovation and creativity in the world of programming, often going above and above to further enhance his task and help others. His working attitude makes him not just a productive worker, but also someone with great character due to his skills in teamworking and modesty, which show the ideal features for anyone hoping to pursue a career in technological industries.

It is my honour to endorse Raevin D. Constantino for TESDA's Game Developer qualification. I am confident that he will be a valuable employee to any developing project he becomes part of.

Sincerely,

**Engr. John Robert S. Bejo**  
**Mechanical Engineer**
