**Dear HR Manager**

I am Raevin D. Constantino writing to express my interest in applying for the Game Developer position in your company. I am currently pursuing a Bachelor of Science in Information Technology at Pamantasan ng Lungsod ng Valenzuela (PLV), where I have developed strong skills in Java and Python programming, as well as an understanding of basic game logic and design.

Growing up in our family's computer shop allowed me to gain early experience with computers and build confidence in troubleshooting and technology use. I also completed a TESDA training program in Java Programming, which enhanced my technical skills. Beyond technical skills, I have also developed strong interpersonal and teamwork abilities through my part-time work at J&T Express, where I learned the importance of clear communication, collaboration, and adaptability in a professional environment. These experiences have taught me that technical expertise alone is not enough one must also be able to work well with others, communicate effectively, and contribute positively to a team's goals.

I am deeply inspired by TESDA's mission of providing accessible technical education and empowering individuals with practical skills. It would be an honor to contribute my knowledge, enthusiasm, and dedication to supporting TESDA's programs and initiatives. I am eager to learn from your team, grow as a professional, and help others achieve their educational and technical goals. I would greatly appreciate the opportunity for an interview to further discuss how I can be an asset to TESDA.

Thank you very much for your time and consideration.

Sincerely,

**Raevin D. Constantino**
